

## Head Office & Branches

Designed to enable owners to fully program & administer branches from the head office. Allowing for automatic, scheduled data transfers to update branches, send sales & inventory data to head office for site-by-site or consolidated reports and admin.

## Hotels

Complete front of house operations module that is fully integrated with the Omega restaurant system. Manage individual, group or company reservations, room status & house keeping, hotel occupancy & status, waiting lists, CRM, marketing & more. The hotel module includes many financial and statistical analysis reports and full back office operations, it can also integrate with PBX, Key Card & TV systems etc.

## CCTV Interface

An outstanding mix of technologies enables owners and managers to observe activities & compare actions with the data from all tills. Search video archives for specific incidents, by keywords or phrases such as VOID, REFUND, or Items identified as inaccurate stock levels! The end result is nothing less than simplicity itself - an efficiently managed video and text searchable archived representation of all transactions.
