

Multi Site

PRM Multi-Site extends the functionality of your store to allow the centralised administration and monitoring of multiple locations. Share stock, customers, suppliers, set different prices at each site, check & transfer stock, central loyalty & gift card management and much more.

Using Microsoft SQL Server replication ensures a scalable, robust system to quickly & reliably synchronise your store information; a transaction can be seen within 60 seconds at your head office! All sites run as independent stores ensuring that if the connection is lost to the head office your business keeps running unaffected.

CCTV/DVR

PRM is fully integrated with the Eagle Eye DVR security system giving an outstanding mix of technologies enabling owners and managers to observe activities and compare viewed actions with entered data. The end result is nothing less than simplicity itself - an efficiently managed video and text searchable archived representation of all transactions. This allows users to search the video archives for specific incidents, by keywords or phrases such as VOID, NO SALE, REFUND, CLOCK IN/OUT or sales items being monitored.

E-Commerce

POSitiveCommerce was created with one goal - to make creating and managing a web site for a store owner as simple as possible. Just one-click moves the inventory you choose from your store to the web. One more click, and you're retrieving orders directly into POSitive Retail Manager. Very simple, very easy to use and NO double entry of stock items to keep your website up-to-date with your POS system!

POSITIVE

RETAIL MANAGER

Retail Warehousing E-commerce Mail order

Innovative Retail Point Of Sale Solutions

POSITIVE Retail Manager is an innovative, easy to use retail solution designed to centralise multi-channel selling through your store, web & mail-order. PRM can improve the performance, reliability and transaction efficiency of your business, reducing staff errors & shrinkage.

POSITIVE Retail Manager excels in over 20,000 retail, web & trade businesses worldwide. Boasting an impressive list of features PRM allows you to do everything from: making a sale, printing barcoded price labels, creating purchase orders, seasonal re-ordering through to customer loyalty & marketing campaigns. Loaded with reports for stock, sales, profit, taxes, customers, suppliers, employees and many more as standard you can be sure that PRM will give you the information back.

POSITIVE Retail Manager embraces the challenge of e-commerce with our fully intergrated POSitiveCommerce.

Main Features

Stock Control	Purchase Orders
POS Transactions	Reports & Data
Invoicing Tools	Web Reporting
Customer Control	Multi Site
Sales & Promotions	CCTV/DVR Integration
Employee Control	E-commerce

Stock Control

POSitive Retail Manager supports an unlimited number of inventory items, which can be standard hard and soft goods and intangible items like services or labour. PRM provides live and accurate stock tracking with the ability to handle back orders, negative levels, size/colour matrix, kits, packages & serialised items. Stock levels can be monitored for multiple locations ie display, store room etc. Returned, used & trade-in items are also controlled.

POS Transactions

With a customisable touch screen PRM makes the sales process quick & easy. PRM's smart search allows for fast customer sales, enhancing loyalty. Split payment, Chip'n'Pin, advanced invoice printing and routing, simplifies the sales process.

Invoicing Tools

PRM has many tools that helps you to ease the sales process, such as: Multiple hold/retrieve transactions, hold as orders/quotes, flexible pricing, discounts & price overrides, gift cards, age verification, coupons, price/weight in barcode etc.

Customer Management

Track customer purchases and use for loyalty & marketing programs. PRM offers unlimited customer profiles with a complete invoice history and the ability to quickly search by account number, phone number or name, assign one of six pricing levels or an automatic discount to each customer.

Sales & Promos

Configure multiple sales events and schedule these to automatically start set by date & time. PRM also has extensive multi-buy & mix'n'match options, manage coupons and help increase sales with suggested accessories and tag-alongs.

Employee Control

Control staff access to all areas of the register and back office through group and individual security settings. There are other useful tools such as a time clock, internal messaging and activity logging that aids in the management of your employees.

Purchase Orders

Unlimited suppliers & products can be maintained. Stock requirement lists, immediate cost change warnings, customers orders arrival notification & supplier back orders are all handled.

maximize profits

Manage Customers

improve efficiency

Reports & Data

With extensive import/export routines, use of data collectors, drill down options, report filtering and over 100 default reports PRM fits most needs. However with an SQL database your data is available to other programs such as Crystal Reports & Microsoft Office. There is also a designer that allows for barcode label designs etc.

Web Reporting

POSitive Connect enables business owners to give authorised key personnel (partners, accountants etc.) access to a website which provides reporting access directly from the live PRM system in real-time.
